Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 13-20, 29, 30, 32, and 33 are rejected under 35 U.S.C. 102(b) as being anticipated by Cushenbery et al.

The device as claimed is disclosed by Cushenbery et al with a body 18 having a receptacle therein sized to receive the end of a pipe 12, a first marking tool 28 (scoring tool) mounted on and protruding into the receptacle of the body with a contact surface to create a mark on the pipe upon rotation of the pipe, an elongated polygonal shaped shaft 56 oriented substantially coaxially with the receptacle and extending outwardly from the receptacle with the body being rotatable upon rotation of the shaft, and the pipe having a pair of circumferential grooves (86,88).

3. Claims 29-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Lee.

The device as claimed is disclosed by Lee with a body 32 having a receptacle therein sized to receive the end of a pipe and a first marking tool 12 (writing implement) mounted on and protruding into the receptacle of the body with a contact surface to create a mark on the pipe upon rotation of the pipe.

Claim Rejections - 35 USC § 103

Art Unit: 2859

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cushenbery et al in view of applicants admitted prior art.

The device as claimed is disclosed by Cushenbery et al as stated in the rejection recited above for claims 1-3, 13-20, 29, 30, 23, and 33, but lacks a second marking tool to mark a second witness mark. Applicant has admitted at page 3 lines 5-19 of the specification that a plurality of spaced witness marks are known to be used on pipes as indicators. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to add a second marking tool spaced from the first marking tool in Cushenbery et al as taught by applicants admitted prior art to place a plurality of spaced marks on a pipe.

7. Claims 12 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cushenbery et al in view of Jiles.

Art Unit: 2859

The device as claimed is disclosed by Cushenbery et al as stated in the rejection recited above for claims 1-3, 13-20, 29, 30, 23, and 33, but lacks the body also having a cutting blade to chamfer the end of the pipe. Jiles teaches using a cutting blade extending into a receptacle to chamfer the end of a pipe. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to add a cutting blade to the body of Cushenbery et al as taught by Jiles to simultaneously chamfer the end of the pipe.

Allowable Subject Matter

8. Claims 7-11, 21, and 23-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

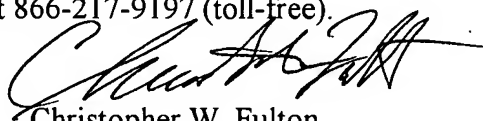

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Oswald and Behnke both show marking grooves on pipes.
